

ISS Inc. - Professional Development & Continuing Education

ISS - professional development and continuing education provides a wide range of continuing and professional programs with flexible learning opportunities to meet your needs. Whether you are a current student, an ISS graduate, professional or retired, our programs are designed to advance your career and enrich your life through learning. Whether you are aiming for a higher level of education, or simply tackling a new interest, our courses and programs can help with your career and life goals in mind.

- Have you completed a Secondary School Diploma or equivalent GED, or are 19 years of age or older?*
- Do you have some experience in the construction industry? It is an asset for the technical nature of understanding housing and building construction systems.*
- Are you reasonably comfortable with self-study? All of our courses are currently delivered online in a blended learning format. What we do is go the extra distance by providing weekly webinars of contact with the instructor and the other course participants. We do offer in-class sessions where 20 or more students are enrolled for that particular course.*
- ISS Education uses web conferencing tools* to help instructors and students connect and collaborate live online. For online classes, students need to have a fully functional computer system with a webcam, speakers and microphone or headset and headphones, along with a reliable high-speed internet connection.*

If you are – GREAT! You do not need to apply to begin this program. First - start by ensuring you meet the admission requirements listed above and then register and pay for the courses listed in our Home Inspection Program – Education web page when they are offered. Note very similar to most every college program we offer the courses is a semester-based format. Check [here](#) for the current course offerings and webinars.

Ideally its best to sign up for your course in advance, since setup will possibly take up to several days.

** Though the classes can be accessed using smartphones and tablets, we recommend using a laptop or desktop computer for a better learning experience.*

Need more info? Have any questions; find out how to [register for a course](#).
