

ISS – Education/Training

Student Feedback

This is a small sampling of student feedback on the online Home Inspector Training Program.

- The instructor for the “fundamentals” course is easy to talk with and made it easy to learn.
- I really love this course. Distance learning was actually very comfortable.
- The instructor was certainly experienced and very professional.
- I really enjoyed the defect photos, which gave us practical views of what to expect in the field.
- The course was very informative, and it’s great to get and hear the different interactions by fellow students.
- The electrical was a very useful course.
- The HVAC course overall was a very useful and certainly a detailed course.
- The structure webinars were my saving grace, since I like the way the instructor interacts and was open to questions and comments.
- The building science instructor was great. The course content was also very good.
- It was convenient to take the exams at the end of the course without dealing with issues of finding and arranging for a proctor.
- It was good to have a mix of little to a fair amount of experience in this learning environment.
- The instructors were open to respond to questions about the home inspection profession, and certainly addressing what to expect.
- The legal case studies opened my eyes to the potential risk that’s out there.
